We at tekVizion are independent experts in Business Communications. We provide professional services, testing, integration and custom development services to service providers, vendors, and enterprise customers so that we can help their businesses accelerate time to value, improve the quality and future proof their investments in their Business Communications networks.

tekVizion offers a range of services including interoperability testing, on-demand access to virtual lab environments, integration services and custom application development. Founded in 2002, tekVizion hosts the first interoperability lab of its kind. The company's extensive lab resources include over 250 network elements and a team of dedicated specialists, certifying over 400 applications per year.

If you are looking for a new challenge and would like to work in an active environment with current technologies and if you are a highly capable, and versatile person then tekVizion is the place for you.

tekVizion is looking for an expert Python Developer to join our team to ensure that our applications and infrastructure are designed and implemented to the highest standards thus maintaining and enhancing our customer trust, this position will provide you with a challenging opportunity.

### **RESPONSIBILITIES:**

The ideal candidate will be responsible for testing the tekVizion products and for automating the test workflows of the tekVizion products delivering high quality product releases

### **The scope of the position is:**

- Understand the feature requirements and develop the appropriate test plans
- Architect, design, implement, support, and evaluate test tools and platforms
- Mentor junior members of the team
- Develop and deliver training materials
- Evaluate and recommend new and emerging software testing products and technologies.

### **Required:**

- Strong Experience in Python Programming
- At least 3+ years of experience in Python scripting
- At least 3 years of experience in Selenium Automation
- Experience in Rest Api's Api Testing.
- At least 3 years of experience involvement with development team(s) that delivered commercial software or software-based services.
- Strong Experience in Selenium Webdriver is an add-on.

- Hands-on experience in Jmeter and Jenkins.
- Experience on Robot Framework, Appium, Python.
- Network/Telecom (good to have)
- Knowledge of network and web related protocols (e.g., TCP/IP, UDP, IPSEC, HTTP, HTTPS, routing protocols)
- Recent experience in VoIP telephony.
- Experience in Java and MySQL DB.
- Hands-on experience in SDLC, Agile process and JIRA
- Ability to work on multiple simultaneous projects.
- Working knowledge of Windows and Linux operating systems.

### **Behavioral Characteristics**

- Team player, able to effectively reach across the organization
- Customer focused and bias towards the customer
- Strong sense of ownership and follow-up
- Self-starter and proactive
- Sense of urgency
- Problem solver
- Ambition to play a larger role in the organization
- Leadership capability

Required Bachelor's degree in Engineering, Computer Science or equivalent.
